DETAILED ACTION

Reissue Applications

1. The reissue oath/declaration is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

i) The declaration fails to contain a proper statement required under 37 CFR 1.175(a)(1) as to applicant's belief that the original patent is wholly or partly inoperative or invalid. Specifically, the error has not been recited properly as it is too broad and too generic. The statement must include specifics about what language in the claims constitutes the error. Since claims 12, 13, 15-22, 26, and 28 broader in scope than the patent claims, the language of the patent claims which is unneeded and caused the error must be recited. See 37 CFR 1.175(a)(1) and see MPEP § 1414.

ii) Since the instant reissue application is a broadening reissue, the declaration must be signed by all of the inventors. See MPEP § 1410.01.

iii) The declaration fails to provide a mailing address for Lonnie Arnold as required per 35 U.S.C. 115 and 37 CFR 1.63(a)(3).

2. Claims 12, 13, 15-22, 26, and 28 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

3. This application is objected to under 37 CFR 1.172(a) as the assignee has not established its ownership interest in the patent for which reissue is being requested. An assignee must

establish its ownership interest in order to support the consent to a reissue application required by 37 CFR 1.172(a). The assignee's ownership interest is established by:

(a) filing in the reissue application evidence of a chain of title from the original owner to the assignee, or

(b) specifying in the record of the reissue application where such evidence is recorded in the Office (e.g., reel and frame number, etc.).

The submission with respect to (a) and (b) to establish ownership must be signed by a party authorized to act on behalf of the assignee. See MPEP § 1410.01.

An appropriate paper satisfying the requirements of 37 CFR 3.73 must be submitted in reply to this Office action.

4. This application is objected to under 37 CFR 1.172(a) as lacking the written consent of all assignees owning an undivided interest in the patent. The consent of the assignee must be in compliance with 37 CFR 1.172. See MPEP § 1410.01.

A proper assent of the assignee in compliance with 37 CFR 1.172 and 3.73 is required in reply to this Office action.

Conclusion

5. Claims 1-11 are allowed, and claims 12, 13, 15-22, 26, and 28 would be allowable upon overcoming the 35 U.S.C. 251 rejection set forth above.

6. Regarding inventorship, it is noted petition was filed 09-14-2001 under 37 CFR 1.47 for joint inventor Tony Matthews refusing to join in the application. However, the applicant then filed, prior to consideration of the petition, a declaration on 10-09-2001 which included Tony Matthews signature thus eliminating the need for consideration of the petition. The examiner's

treatment of the correction of inventorship via 37 CFR 1.48 in the office action dated 01-19-2002 was improper and has been rescinded.

7. Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 5,842,685 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.
